

# FOUNDER'S NOTE

---

Hi there!

Our names are Josh and Mik, and we founded Clean Planet Project Co. together in June of 2020 - a noteworthy time for many reasons. We realized during the COVID-19 pandemic and Black Lives Matter movement that a lot can happen when people work together to address an issue. That got us thinking... how can we get people together to combat global pollution and climate change? This led to the development of our CleanUp app, which is a valuable tool for the (seemingly impossible) task of cleaning the planet.

Our mission is to educate, inspire, and empower individuals and communities to make a positive impact on the Earth. We are so grateful for those who are supporting this mission and look forward to finding more innovative ways to give back to our planet.

With gratitude,

Josh and Mik
